Experience

- March 2022 - Working

Chennai

 Software Engineer - Web Designer  
CHG IT Consultancy

Analyzed and updated SRS documents, developed wireframes, and designed high-fidelity UI interfaces for system functionality and usability. Implemented front-end with Vue.js and Vuetify, created reusable components, and optimized website visibility via SEO strategies. Designed marketing materials, maintained the company website using Joomla, and documented project MOM for effective communication. Balanced MBO goals with tasks while leveraging tools like Adobe Design Tools, Joomla, Vue.js, SEO tools, and Animaker.
- August 2021 - February 2022

Tirupur

 UI/UX Designer  
THE CHENNAI SILKS CORPORATE

Designed user-centered solutions by analyzing business needs and user feedback, creating user flows, wireframes, prototypes, and mockups. Translated requirements into style guides, design systems, and visually appealing interfaces. Collaborated with product managers and engineers to gather and evaluate user requirements, using storyboards and sitemaps to illustrate design ideas. Tools used: Adobe Photoshop, Illustrator, XD, Figma, and Balsamiq.
- December, 2020 - March, 2021

Coimbatore

 Internship Trainee  
RMM Technologies

Developed marketing materials, including logos, brochures, infographics, presentations, and advertisements. Delegated tasks to the design team while offering guidance on project aspects. Learned React JS and created a static website using HTML and WordPress, successfully achieving targets.

Latest projects

- Digital Currency For Business Board Game Application

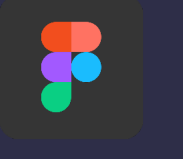

Developed a digital currency system for a board game app using Vue 3 and Vuetify 3, integrating transaction management and history tracking. Designed key features for banker-to-player, player-to-banker, and player-to-player transactions, ensuring smooth interactions. Built intuitive dashboards for the banker and players, enabling real-time money management and transaction visibility. Enhanced user experience with streamlined fund management, balance synchronization, and detailed transaction history logs.
- Website Design and Conversion

Designed and developed responsive websites, ensuring seamless user experience and aesthetic appeal across devices. Converted designs into functional websites using HTML, CSS, WordPress, and other tools while maintaining brand consistency. Optimized website performance and implemented SEO strategies to improve visibility and rankings. Delivered user-centric solutions tailored to client requirements and business goals.
- Search Engine Optimization (SEO)

Optimized my personal website for top ranking on Google by conducting keyword research, enhancing on-page SEO, and improving site performance. Achieved a significant increase in organic traffic and visibility, showcasing strong SEO strategy implementation.
